PROFESSIONAL EXPERIENCE

Senior Software Engineer | NectarIT Technology Pvt Ltd *Oct 2025 – Feb 2026*

CAFM – Enterprise Facility Management — *Java Developer*
Stack: Java 8, Spring Boot, JPA/Hibernate, PostgreSQL, Neo4j, Cassandra, Solr, Keycloak, RabbitMQ, Apache Flink, Tomcat

- Developed and maintained backend services for an enterprise CAFM (Computer-Aided Facility Management) application supporting facility, asset, and maintenance operations.
- Integrated JPA/Hibernate with relational (PostgreSQL) and NoSQL (Neo4j, Cassandra) databases; handled DB migrations and Tomcat deployments.

Software Engineer | Aaludra Technology Solutions Pvt Ltd *Oct 2021 – Sep 2025*

Ticketing Tool – SaaS Platform — *Backend Developer*
Stack: Java 11, Spring Boot, GraphQL, React.js, Redux, SonarQube, Tomcat

- Led design of SaaS ticketing system; developed GraphQL APIs and custom auth microservice with RBAC and real-time ticket notifications.
- Integrated DigitalOcean S3 for attachment storage; enforced code quality via SonarQube.

E-Commerce Application — *Frontend Developer*
Stack: RemixJS, Redux Thunk, React Hooks, TypeScript

- Built responsive UI with dynamic SEO-friendly routing; implemented lazy loading and Redux-Thunk state management for large datasets.

Fuji Electric CRM — *Frontend Developer*
Stack: Next.js, Redux Thunk, React Hooks, TypeScript

- Developed Next.js application with GraphQL APIs, lazy loading optimizations, and bcrypt.js-secured authentication.

HRMS Tool — *Backend Developer*
Stack: Java 11, Spring Boot, React.js, MySQL, Tomcat

- Built shift assignment and attendance/payroll report modules; integrated OAuth API for secure authentication; collaborated on-site with client.

RTP – Request To Pay — *Backend Developer*
Stack: Java 8, Spring Boot, Apache Kafka, Docker, Jenkins, XSD/XML

- Built microservice architecture with Apache Kafka for async inter-service messaging; established SEPA XML/XSD schema compliance for financial messaging.
- Deployed using Jenkins CI/CD and Docker containers.

PSD2 – Payment Service Directive — *Backend Developer*
Stack: Java 8, Spring Boot, Docker, Kubernetes, Liquibase

- Developed PSD2-compliant banking services; implemented containerized deployment with Docker/Kubernetes and DB version control via Liquibase.

KEY ACHIEVEMENTS

- Developed RESTful APIs in Java, ensuring seamless communication between frontend and backend systems.
- Designed and maintained responsive web applications using ReactJS, HTML, CSS to enhance user experience.
- Collaborated with cross-functional teams to deliver high-quality software solutions aligned with business objectives.
- Conducted code reviews, provided constructive feedback, and ensured adherence to coding standards.
- Documented code, designs, and methodologies to ensure the clarity and maintainability of software solutions.
